

Time Out Jumper

Part No. 15-505

Part No. 15-505KIT

Product Description

Wurtec is proud to introduce our new patent pending time out jumper. It is just the tool you need to add an unprecedented level of safety to your company. Designed to “time out” after a user defined period of time, it prevents elevators from running with circuits mistakenly jumped out.

You can even electronically assign these jumpers to the appropriate personnel. The small and versatile time out jumper will not only protect your technicians but also the riding public.

This small, but versatile, ‘must have’ fail safe device protects both elevator engineers, maintenance personnel and passengers alike!

Features Include:

- Flashing LCD screen to warn when time is running out. A reset of the timer is possible.
- Programmable time duration.
- Voltage: 250V AC/DC at 8 Amps.
- Programmed with only two buttons.
- Through mini USB port you can program SERIAL NUMBERS for identification and your NAME for personalization.
- Password mode enables timer programming to be encrypted so that it cannot be changed by another user, without the password.
- Link out mode enables the user to personalize the unit with up to 32 character spaces with either his/hers or company name.
- Requires 2 x AAA batteries (not included)
- Works with both Windows XP and Vista
- Status mode displays current settings.
- Sleep mode facilitates longer battery life

**** Kit has threaded probe tips to allow connection of micro hooks (2 included) or alligator clips (2 included). Protective case included.****
